ABOUT US

İVEK, with a field of activity covering Pharmaceuticals and Pharmacy in particular and Health Sciences and Technologies in general, first emerged as the group of individuals in the Pharmaceuticals and Pharmacy Agency. It was highly appreciated by the industry for her activities under the legacy of her name and history, and evolved from the field of drugs and pharmaceuticals into a form that covers all health stakeholders with stronger bonds in a more embracing fashion closer to her origins.

Furthermore, having observed the direct repercussions of improved conditions of health care industry on public health owing to the researches and works she conducted within all this period of time, İVEK has decided to focus on “the health of healthcare first” to achieve the goal of “health first”.

As a result, the İVEK Foundation, which not only feeds on her well-rooted history but also aims at creating value in field of Pharmaceuticals, Pharmacy, Health Sciences and Technologies with her young and dynamic structure, concluded her foundation process finally in 2016 after having served as a society for a decade by bringing together her well-experienced founders who gave direction to or influenced healthcare policies in Turkey and across the globe with all actors operating under the roof of healthcare concept. Thus, as a non-profit foundation, İVEK has set her working objective as being human-health oriented.

Within this framework, İVEK has been a gathering point for people who think, produce, research, develop and create added value for health. Serving as a connection point between public authorities and private sector, researchers and investors, and students and relevant professional groups, İVEK has become a hub that endeavours to achieve a sectoral sustainable state of well-being with remedy of shared wisdom by searching for treatment methods for halting points of healthcare. As a summary, İVEK, with her organisation in line with her mission and her strategical objective in accordance with her vision, is taking firm steps forward on the way to become a ‘point of reference’ in health with a view to fusing the bonds of communion of the past with those of the future.

VISION

To ensure that the entire healthcare industry, particularly the Pharmaceuticals and Pharmacy, achieves a high, respectable level on which a safe, quality, accessible and sustainable service that respects human dignity could be rendered without making any concession from scientific and ethical principles.

MISSION

Based on the motto “**the noblest value is knowledge; the most outstanding service is service to human**”; İVEK shall be a remarkable centre of reference with an understanding of work that embraces all components of the entire healthcare industry, particularly Pharmaceuticals and Pharmacy.

Empowered by the academic knowledge and professional experience of the industry, İVEK shall work to maximize the level of Pharmaceuticals, Pharmacy and other health professions and service agencies based on international norms in cooperation with scientific circles and non-governmental organisations.

İVEK shall consider any individual/organisation that plays a role in healthcare services as a stakeholder, exchange knowledge and experience with them, and exert efforts to create a joint position.

STRATEGICAL OBJECTIVES AND TARGETS

Priority topics include establishment of a well-coordinated national industry, development of qualified labour force for this industry, provision of an R&D environment promoting and developing production and full accommodation of professional needs of relevant professions in order to ensure safe, quality, accessible and sustainable services that respect human dignity in field of healthcare. It requires well-organized, transparent and implementable legal grounds that allow public and private sectors to act in coordination and cooperation in order to achieve such overarching objectives in the country and in the region.

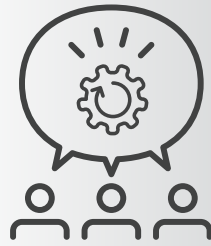

Achieving high ideals takes long-term, resolute, highly-sacrificing and planned work. With such an understanding, it is obvious that common platforms on which all stakeholders can exchange their respective knowledge and experience will play a critical role.

In line with her vision and mission, İVEK aims to plan and coordinate fastidiously all her activities in accordance with STRATEGICAL OBJECTIVES via “committees” that have been set up internally within her body.

Boards, Committees and Working Groups Under the Foundation

OUR EVENTS

İVEK INTERNATIONAL CONVENTION OF PHARMACEUTICALS AND PHARMACIES

İVEK International Convention of Pharmaceuticals and Pharmacies is an international event that functions as a wide platform bringing together representatives of public authorities and the industry in every field of Pharmaceuticals, Medical Devices and Pharmacies at a national and international level with symposia, workshops and various trainings at a very wide range.
